ABOUT NORTHGATE

Northgate Environmental Management, Inc. (Northgate) has been delivering innovative solutions to our clients' environmental, geotechnical, explosive ordnance disposal, and hydrogeologic engineering challenges since 1999. Our staff are experts in identifying, assessing, remediating, and restoring the value of contaminated properties and other natural resources. Northgate's senior engineers, hydrogeologists, and scientists have developed a solid reputation with both public and private sector clients and regulators for providing recommendations based on sound technical judgment, state-of-the-art remediation practices, and knowledge of regulatory requirements.

We are a California-certified small business serving our clients from offices in Oakland and Laguna Hills, California, and Philadelphia, Pennsylvania. As a small firm, we offer flexible, customized, and responsive services. Our principals are closely involved in all of our projects, ensuring technical quality, consistency, and the successful achievement of our clients' project objectives.

CORE CAPABILITIES

- **Phase I and Phase II environmental site assessments (ESAs)**
- **Pre-design and pre-construction investigations**
- **Lead-based paint, asbestos, and biohazard investigations**
- **Leaking underground storage tank (UST), and spill investigations and emergency response**
- **Ecological and human health risk assessments**
- **Geotechnical engineering evaluations**
- **CERCLA and RCRA Remedial Investigations and Feasibility Studies (RI/FS)**
- **Stormwater management and sampling audits and plans (SWMPs) and spill prevention, control, and countermeasures audits and plans (SPCCs)**
- **Environmental remediation and removal actions**
- **Detection and removal of ordnance and explosives**

With a focus on sustainable solutions, the Northgate Team brings a broad perspective on environmental, social, and economic benefits to our environmental and water-related projects. Environmental compliance starts with protection of human health and the environment, followed by thorough planning and delivery of sustainable resources, facilities, and programs. Northgate is highly committed to working with our clients to implement sustainable solutions to environmental challenges and maximize the value of the natural resources under their control.

We are proud to be an invited member of the Sustainable Restoration Forum (SuRF) and of our contribution to Integrating Sustainable Principles, Practices, and Metrics into Remediation Projects. This effort was the first comprehensive, independent assessment of sustainable remediation – a movement to encourage environmental clean-ups that minimize carbon emissions, conserve fossil fuels, and still remove contaminants from soil and groundwater.
